**"OFTEN TIMES,** people become so accustomed to feeling ill, not realizing thyroid disorders are the root of their health crisis," explains Dr. Douglas J. Pucci, founder of the Pucci Wellness Center. A pioneer in functional medicine and the natural treatment of the thyroid, Dr. Pucci is helping patients heal from autoimmune diseases and thyroid symptoms by balancing hormones and the immune response. He takes pride, for instance, when he is able to help Grave's patients avoid orbital surgery, or Hashimoto's sufferers reverse their antibodies and decrease medication.

A practicing physician and natural healthcare doctor, Dr. Pucci is that rare physician who listens—really listens—and restores well-being by offering an integrated functional approach to care.
